

## Utah Division of Air Quality Fugitive Dust Control Plan

Revised: 2/24/06

The Fugitive Emissions and Fugitive Dust Rule (R307-309) requires a fugitive dust control plan (R307-309-6) from all sources whose activities or equipment have the potential to produce fugitive dust, airborne dust, in Davis, Salt Lake and Utah counties and Ogden City. Fugitive dust control plans minimize fugitive dust on-site from pits, yards, storage areas, and areas of operation and to prevent opacities caused by fugitive dust from exceeding **20% on site** and **10% at the property boundary**. The fugitive dust rule addresses storage and handling of aggregate materials, construction/demolition activities on sites greater than 1/4 acre, road ways, mining activities, and tailings piles and ponds. Sources shall develop their dust control plans and submit them to the Executive Secretary **no later than 30 days after the source becomes subject to the rule**.

*Please keep copies of the dust control plan on site for your records and as a reference for your employees.*

Fugitive dust control plan is submitted to comply with:

- ☐ Rule R307-309-6      ☐ Approval Order Condition/  
Operating Permit Requirement      ☐ Settlement Agreement
